Mission Success criteria			Cowboy1	Direct Fury1 flight to assigned targets*. And Fury1 should achieve a Mission Success. *(see targets section for details)			
			Fury1	Destroy at least 10 MLRS (BM21) Launchers.			
			Falcon1	Protect Cowboy1 AND Fury1 from any Radar/IR SAMs, and no single loss should occur			
Mission Partial Success criteria			Cowboy1	Fury1 should achieve PS			
			Fury1	Destroy at least 6 (BM21) MLRS launchers			
			Falcon1	A maximum of ONE loss to any of the both flights (Cowboy1 & Fury1)			
Air to Air Weapon Loadout (Free or Fixed)			Free				
Air to Ground Weapon Loadout (Free or Fixed)			Free				
Mission Flight plan (Free or Fixed)			Free				

BACKGROUND

Albania has long waited its complete independence from Serbia, and EU has done nothing in the past few years to solve the issue. Albania has announced its independence a week ago and Serbia refused the independence and therefore FRY forces has launched a massive attack against Albania. Meanwhile, unconfirmed number and type of ships have also scattered within Albanian waters.

CURRENT SITUATION

FRY forces have broke-through the Albanian territory and moved its MLRS within range of multiple Albanian cities and threatened to seize and cut-off supplies to Albania if its

current president doesn't hand Albania to Serbian forces. On the other hand, Albanian president has spoken to US officials requesting immediate military support to repel the Serbian attack on Albanian territory.

The pentagon has sent a classified briefing for the 185th Squadron, requesting planning a quick attack against those Multiple Launch Rocket Systems in North Albania.

However, USAFE isn't ready for a war, and our only squadron in Croatia has to take the job for this one.

MISSION DETAILS

Weather –

Wind: 182 deg @ 5 kts.

19 deg C

Clouds: Clear

Visibility: 4 nm Good with some fogs around 10,000ft

Con Layer: 30,000 ft MSL base.

Enemy – The enemy has multiple high threat aircrafts currently in service that's including the MiG-29SM and also an A-50 mainstay and some Mig-21mbis. Adding to that, they have many different SAMs in service including the SA-10, SA-6, SA-5 and unconfirmed number of portable SAMs including IR guided missiles. Intel suggests that Serbia also have older models of SAMs such as SA-2/3/4/13. Latest reports say that Serbia may have requested support from Russia and its allies, but if that's the case then reinforcements would be arriving from the sea to start an invasion from Albanian ports, which may pose a real threat to our forces in the region.

Friendly – A single E-8C is taking-off at 04:20:00 and that's all what's available for us.

Mission – Fury1 primary mission is to neutralize at least ten BM21 MLRS at target site when requested from the FAC aircraft (Cowboy1) while the SEAD Escort flight (Falcon1) provides BOTH SEAD and Escort for both flights (Fury1 & Cowboy1) for MS.

For PS Fury1 should at least kill 6 BM21,

Target –

**A serbian BM21 currently in service*

Note that the only targets should be destroyed is the BM21 otherwise it WILL NOT be considered as a kill for achieving MS.

Route –

Our package will be taking-off from Split AB in Croatia as Croatia authorized us to use it airspace unlike Montenegro and Bosnia & Herzegovina who refused to use their airspace and we need to avoid over flying their airspace AT ALL COSTS.

IF YOU FLY OVER THEIR AIRSPACE THAT WOULD IMMEDIATELY CONSIDERED AS MISSION FAIL. The map shows what Intel suggest for this mission, stick to it.

ROE – No Flying over Neutral airspaces at all costs. Engage once confirmed hostile by Visual ID or when confirmed by your FL, as there is no AWACS support for this mission.

Ordnance – Free

Wishing you the best of luck
