185th VFW
3 Pohang airbase barracks
Pohang airbase
Pohang
South Korea
Priority: Class "A"

Dear member of the 185th squadron,

You have been selected for a top secret mission, the details of which cannot be explained at this time, although you should know the small matter of world security will depend on the success of this mission. You and your F16-C40s have been relocated from Pohang airbase to Kangnung airbase.

The information we can give you to help you prepare for this very important mission is as follows:

- You should be prepared for a low level flight
- You should be prepared to fly in the dark
- You should be prepared to engage A-A with radar in a standby state
- You should be prepared to engage A-G with radar in a standby state for the following weapon types: GBU22/B, AGM-65D and BSU-49s **at very low altitude!**
- You should be prepared to engage moving and non-moving targets

We suggest that you practice flying under these conditions by engaging an abandoned factory near Kangnung airbase; Pukp'yong Cement, the Chinju Nuclear Plant (near Saechon) which are both due for demolition in the next few days anyway. We advise you also to find some ground units which are about to be scrapped.

You will receive a very detailed briefing containing all the information you will need at least 1.5 hours before you are due to take off.

We thank you in advance for this great service

Secretary-General Ban Ki-Moon.

Certified by the U.S President:

George V. Doosh
