Takeoff time	Callsign	Task	Target	Time on Target	Package #	AC # & Type
16.34.00	Chalis 1	AWACS		16.50.00	1996	E-3 Sentry
17.00.00	Fury 1	SEAD Escort		17.16.40	1697	2x F16A-MLU
17.01.00	Cowboy 1	Deep Strike	Nimpo Chem Plant	17.20.40	1697	4x F16A-MLU
17.02.00	Falcon 1	Escort		17.16.40	1697	2x F16A-MLU
(1) Blue color indicates for human use. Red color indicates for AI only.						
Mission Success criteria			Fury 1	No losses from enemy air defenses for Cowboy 1		
			Falcon 1	No losses from enemy air threats for Cowboy 1		
			Cowboy 1	Destroy Main Plant, Processor, Large Warehouse, NW Storage Tanks (4 out of 6)		
Mission Partial Success criteria			Fury 1	1 loss from enemy air defenses for Cowboy 1		
			Falcon 1	Max of 2 losses from enemy air threats for Cowboy 1		
			Cowboy 1	Destroy Main Plant, Processor, Large Warehouse		
Special requirements			Cowboy 1	Under NO CIRCUMSTANCE should the center Storage Tank be destroyed. An ACMI tape is required from the Strike flight.		
Air to Air Weapon Loadout			Free			
Air to Ground Weapon Loadout			Free			
Mission Flight plan			Free			

## BACKGROUND

It is the year 2025. The major players of Earth united themselves into 3 power blocks: the Union: controlling everything between North and South America, Japan and South Korea; the Human Reform League: occupying former Asia and the Middle East and the AEU: owning Europe and Africa. Since South Korea is a part of the Asian mainland, continuous wars erupted over its control ever since the formation of the power blocks in 2017.

## CURRENT SITUATION

The Union has reasons to believe that the Nampo Chemical Plant is being used to manufacture a new and powerful biochemical weapon, which symptoms are growing an additional head. This weapon is currently being stored in the plant's warehouses. Your task is to shut down this plant and if possible, destroy their raw materials in the process.

## MISSION DETAILS

Enemy - We know that the enemy has several long and short-range SAM threads stationed around the area. Mobile threads are to be expected as are AAA threats over the target area. Regarding air threats, Intelligence reports us the HRL have some relics called "Mig-21Mbis" around the area as well as Mig-29SM.

Friendly – To allow for a safe retreat, command placed some air defenses of our own near the FLOT line over our route as well as over one of the home plates.

Mission – The main objective is the Main Plant, Processor and the large Warehouse, where the HRL store the raw materials and finished biochemical weapon. To discourage any attempts to restart their production, Command also issued to destroy at least 4 out of 6 Storage Tanks to the NW of the target as a secondary objective. **Under NO CIRCUMSTANCE should the center Storage Tank be destroyed.** Destroying this tank will disperse the biochemical weapon over a vast area. Spec Ops will secure this objective tonight this very day. **An ACMI tape is required from the Strike flight.**

Precision high-altitude bombing is therefore encouraged.

Target –

RED – Storage Tank (Mission Failure if destroyed), YELLOW – Warehouse (part of Partial Success), GREEN – 6 Storage Tanks (Mission Success criteria)

Route - Package will launch starting at 17.00 h. AWACS is available. Escort (17.02 z) and SEAD Escort (17.00 z) will depart from Kimpo Airbase, Strike flight (17.01 z) will depart from Suwon Airbase. Push point for the Package will be steerpoint 3. Target steerpoint is steerpoint 6. Alternate airbase is the R107 Airstrip.

Weather - It has been a nice summer so far, so a cloudless sky with great visibility and shallow winds are expected.

Good luck to us all.
