CURRENT SITUATION

One more Air Pistols Teaser! This week the 185th will be flying together providing Close Air Support for a US Marine beachhead. A small regiment is disembarking at Wonsan as we speak. It is our job to engage enemy units in the vicinity of our forces.

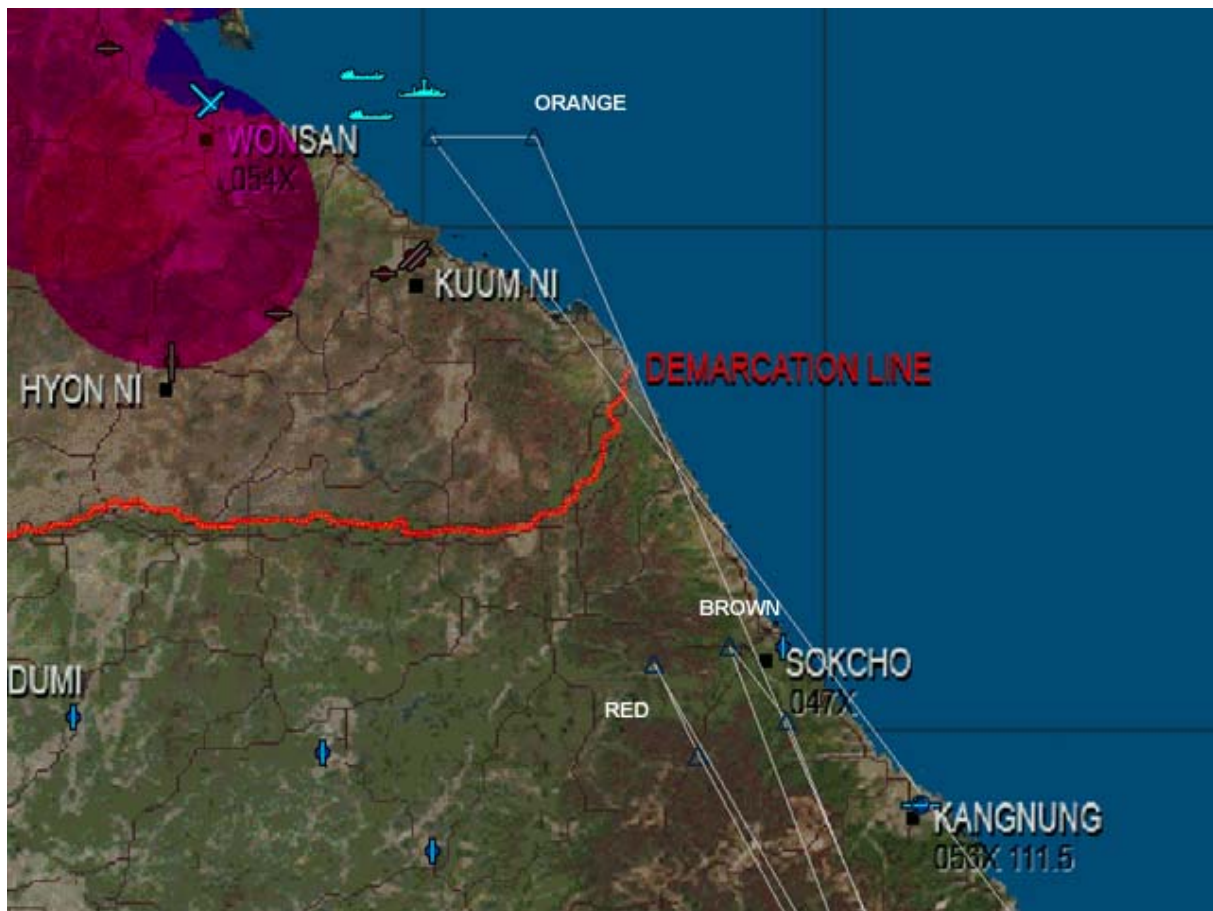

MISSION DETAILS

Weather – Light cloud coverage near to the target area was observed by earlier reconnaissance flights.

Enemy – North Korea possesses a vast arsenal of several high-threat 4th generation aircraft capable of carrying the R-77 as well as 3rd generation low-threat vectors.

On the ground, satellites confirm the extensive employment of mobile double and single digit SAM units. SEAD flights are recommended to carry full load of HARMs. SA-6 and mobile AAA units were detected close to the TGT area.

Friendly – Check ATO for friendly air units operating in your area. Refuelling will be available during the mission in three different orbits according to map below:

Mission –

PACKAGE 2053: Escort friendly tanker to orbit ORANGE and back to its home plate.

PACKAGE 2065 Provide close air support to friendly units. The package consists of a FAC (A-10), whose task is to seek and mark enemy ground units, and 8x-F-16Cs for On-Call CAS. The SEAD and TARCAP flights will also be supporting the package.

Target –

PACKAGE 2053: Enemy fighters scrambling from the north of the Sea of Japan to intercept Camel 1.

PACKAGE 2065: Earlier recon flights photographed several tank and infantry battalions moving toward our beachhead. They are priority targets. Besides, mobile SAMs providing support to enemy forces are also on the top of our targets list.

SPECIAL RULE FOR THIS TE: Human AWACS (or any other pilot in the User Interface) **is not allowed** to offer either BDA on enemy ground units or

position of enemy ground units, which are under attack or not. Its only task is to support the mission package on the air-to-air picture.
