BACKGROUND

Intel reports that Samjiyon-up airbase near the Chinese border is going to be the common base for our enemy Frina and North – Porea and therefore will soon be upgraded with highly sophisticated weapons and fighters.

CURRENT SITUATION

This would mean a big advantage for the enemy to finally recapture our homebase Orang and disturb the current balance we established many years ago. We cannot allow that!!

MISSION DETAILS

Several enemy stealth bombers have already been parked into these hangars. Simple task, destroy them.

With the bombers out of commission the enemy will run out of good opportunities and will think twice before undertaking any further steps against us and our ally South – Porea.

Enemy

See order of battle for air threats. As for ground based threats, expect several sams such as sa6, sa5, sa10 and others. Target area is presumed to be **very heavily protected** by IR SAM's and Tripple A's!!

Good luck and may you all rtb.
