

5th of February. 2010 - 1826 Zulu

News Alert Update: NATO Commanders have issued a special mission to attack the Serbian A-50. The 185th received the task orders. The mission is to be carried out on the 7th of February, 1930 Zulu.

US Intel are expecting to see multiple air defense assets operating within Serbia.

**Expected Serbian Air Space Defense Systems Coverage.*

Although this is believed not to be 100% accurate, but Intel suggests us to consider this in planning.

Penetrating Serbian air space will not be easy.

Blue zone in the map expected to include broad range of Surface-to-Air Missiles, SA-2's 3/4/5/6/7/9 and SA-10's

The Maroon zone is expected to be covered by AAA and the Red zone represents the (assumed) Long Range SAM's zone by US Intel.

Sleep well, you have less than 48 hours for the mission!
