

The Use of F4Browse to Edit Theatre Data By Homer

1. **Before doing anything**, make a backup of the “FALCON BMS 4.32\DATA\ADD-ON BATTLE FOR BALKANS\TERRDATA\OBJECTS” directory.
2. Start F4Browse.exe, and from the file selector, open the default FALCON4.FED (found in the Objects dir you just backed up) file.

The display will look like this...

3. Find the aircraft you want to change, then double-click it. I have used F-16C-50 in this example...

Vehicle Data Details

F-16C-50 Vol No: 397 NCTR/Cockpit: F16 Vis Sig: 0 ACD Number: Update

Renumber
Add Weapon
Add HP

4. Now, to add AGM-88 HARM to hardpoints 3 and 7, simply double-click on the first 3,7 in the list as above. This will open a dialog as per below:

Hardpoint Data

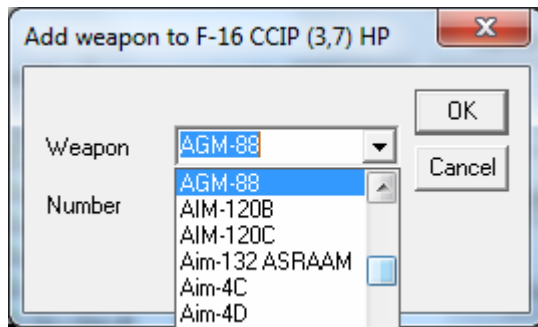

F-16 CCIP (3,7) UPDATE
Cancel

Used By ... Weapon List Nr: 352

Weapon	P...	C.	WeaponID
AIM-9M	0	1	12
BLU-107/B	1	3	65
Mk-82 AIR	2	3	75
Mk-84 AIR	3	1	76
CBU-52B/B	4	2	81
CBU-58A/B	5	2	69
CBU-117/B	6	2	248

Delete Add Sort

5. Hit the Add button and find AGM88 from the list accordingly:

6. Click 'OK' on this window, 'Update' on the 'Hardpoint Data' window, then finally 'Update' on the 'Vehicle Data Details' window.

7. Exit F4Browse.

8. Go into BMS 4.32, create a TE, and be amazed at how good you are! If you really want to, you could add them to 4 and 6 also.

Hopefully this is clear enough, but if not be sure to ask.

While you may use this to your hearts content for offline flying, only modifications sanctioned by Command in the 185th VFS may be used in online and in particular, official flights.

Cheers,
Homer
