

## 185<sup>th</sup> Reservoir Dogs – Mission Brief

**West Forge**

Major Mad Dog McQ

---

Having gained a great deal of territory in the North West over recent months, we are tasked with forging forward and capturing Nampo. This is the first part in a long series of attacks to be brought to bear on the DPRK in their North Western strongholds.

Your survival in this mission will depend heavily on your ability to keep to your TOS times.

First in, are the F-15E's from 116<sup>th</sup> Squadron. They are there to provide Suppression Of Enemy Air Defences in the area. Due to recent supply problems, no 88's were available and our friends in the 116<sup>th</sup> are running the gauntlet to keep you guys safe. There's no guarantee that they will be able to suppress all defences, so hit your targets fast and clean – then get outta there!

Viper pilots will be from either the 97<sup>th</sup> or the 3685<sup>th</sup>. Depending on which unit you join, you will be hitting the Plants or the Yards. To the West of Nampo is an SA-2 site which will come under attack from the F-15's as will the AAA in the North East of Nampo itself.

When attacking your targets, drop your ordnance and break hard each time to maximise the distance between you and the AAA. Don't stay over target for any longer than you have to! It'll be **HOT** out there!

Enemy aircraft from neighbouring bases are expected to be on alert. MiG-29's and SU-27's are stationed to the North and to the East.

Good luck gentlemen <S>

MD
