Re: Human Shield

Mission Brief – “Human Shield”

Two US Marines were captured by DPRK Forces a few days ago and they are now being held captive at Chinju Nuclear Plant as human shields. The Marines were part of an elite reconnaissance group attempting to gather intelligence on defences around the plant. A rescue mission was initiated last night but failed. Unfortunately, the capture of these men has meant that we now have to rely on satellite intel and have the added burden of hitting a target containing friendlies.

We have received direct instructions from the US President to proceed with this mission. May God be with those brave men.

Two F/A-18's leaving Taegu at 09:02 on SEAD

4 x AGM-88 2 x CBU-87 2 x AIM-120 2 x AIM-9M

Target – SA-5 & AAA

Four F16-C's leaving Kwnagju at 09:04 on Deep Strike

2 x GBU-24 2 x BLU-109 2 x AIM-120 2 x AIM-9M

Target – Chinju Reactor

This is the REACTOR. Under no circumstances should you target any other building. The US Marines will probably be held in one of the Transformer buildings. Anyone who hits a Transformer will be required to answer to the CO directly.

It's gonna be a bit of "Give & Take" out there!

Steerpoints Fixed – Weapons Free.
