

Operation Gallant Spear

Recent intelligence discoveries have found that the enemy has become desperate enough to utilize Chemical Weapons, they are being processed and stored at the 8th February Vinalon Complex Chemical plant in Hamhung city, it is only a matter of time before they are fully serviceable so it is up to us to ensure that this latest threat is completely destroyed.

It is known that the nerve agent intended for use in the battlefield is missing an activating component as well as a working delivery system, the missing agent is due to be flown in from a neighboring nation in the next two days, before it is added the substances at the plant are relatively harmless, therefore, HQ wants this site FLATTENED!! And fast! Enemy defenses are mainly Airborne, though there are some serious ground based threats as well, however, previous SEAD strikes have been successful in clearing out some of the nearer SAM sites, there are, though, various armored units in the area and enroute, be sure to familiarize yourselves with their engagement envelopes and keep as clear as you can.

Code name for this Operation is Gallant spear

Air cover will be provided by our good friends from the F15C Squadron at Suweon airbase, and our return by an F16 CAP from our own Squadron.

The primary target will be the first laboratory listed in the recon screen, it is the small building at the south west of the site, but ***all buildings are legitimate targets***, this plant MUST be put out of commission!

Weapons loads are 2 BSU 50

4 AIM 120 AMRAAM

1 AIM 9M

1 Fuel Tank

The weapon loads are fixed.

Steerpoints may be adjusted.

The only Flight available for Human pilots is Package 3691 F16 4 ship Deep Strike against the Chemical Plant Laboratory. Take off time is 05:08

Winder.
