

MISSION BRIEF

LAN Mission 3

Our troops have made significant gains and are continuing to engage enemy ground units.

It is anticipated that enemy artillery and armour battalions being held in reserve at two locations 30 miles behind the FLOT will move to support their forces at the front and you have been fraggd to hit them before they get there.

Flight details:-	Takeoff 17:00	Package 3718	Cowboy 1 (Pre-Plan CAS)	2 x F-16C
	Takeoff 17:02	Package 1721	Falcon 1 (Pre-Plan CAS)	2 x F-16C

Targets:-	Package 3718	3702nd Tank Battalion
	Package 1721	3703rd Towed Gun Battalion

The two F-16 flights are the only flights intended for human pilots.

The targets for your flights are in the same general area and you should support each other against air threats on ingress and egress. Steerpoints and their timing are set with this in mind.

F4-Gs from Kwangju Airbase, are flying SEAD to take out the western SA-5 site at Asan.

F/A-18s out of Kimhae International are also flying SEAD to hit the SA-5 site at Icheon to the north east of your targets.

F-15s will accompany the F4-Gs from Kwangju and fly Sweep in the target area.

The known ground threats are as shown on the mission map and air threats are expected to include MiG-29s and MiG-23s. Intelligence also reports that SU-27s have now arrived in theatre.

The loadouts for your F-16s are at the discretion of the two flight leads. Loadouts for all aircraft other than the F-16s are fixed.

Steerpoints and takeoff times are fixed for all the flights.
