

Enter the killzone

This will be a tough mission, we have been all but kicked out of Korea and the enemy is throwing all he has at our remaining forces.

Our troops are confined to a small pocket around Pohang airbase.

F-4:s and A-10:s stationed at Pohang are striking ground units and ADA as fast as they can, and we are tasked to assist them from our base at Kadena.

Two packages will be available for humans, 3712 SEAD Strike (2-ship F-16) and 3717 Interdiction (4-ship F-16).

3712 SEAD strikes the southern SA-5 site.

3717 Interdiction flies S&D in the Taegu area. In that sector the 3695th Armoured battalion (T-62) are reported to be resting before continuing their advance towards the salient.

The map:

F-4:s from Pohang are tasked to strike the northern SA-5 site. A-10:s from Pohang will strike the HQ-battalion and the T-62 battalion northwest of stp4 on this map.

LOADOUTS ARE FREE, STEERPOINTS ARE FIXED.

The recon photo:

If you are east of stp4, watch out for our HQ battallion.

The text in the recon pic does **not** prohibit you from attacking vehicles outside the Taegu area, just thought I'd clarify that. ☺

Intel:

Enemy aircraft based in the area are reported to be MiG-29 and SU-27.
The AA-12 Adder is reported to be in active service now in sufficient numbers.
I don't need to warn you about the lethality of those missiles!

Air activity is expected to be high, so be cautious!

Good luck,
Col. Triton
