

Flankers Beware!

The mission objective is to strike the Huich ón Machine Tool Plant.
It is one of the few remaining facilities available to the DPRK for Tank production.

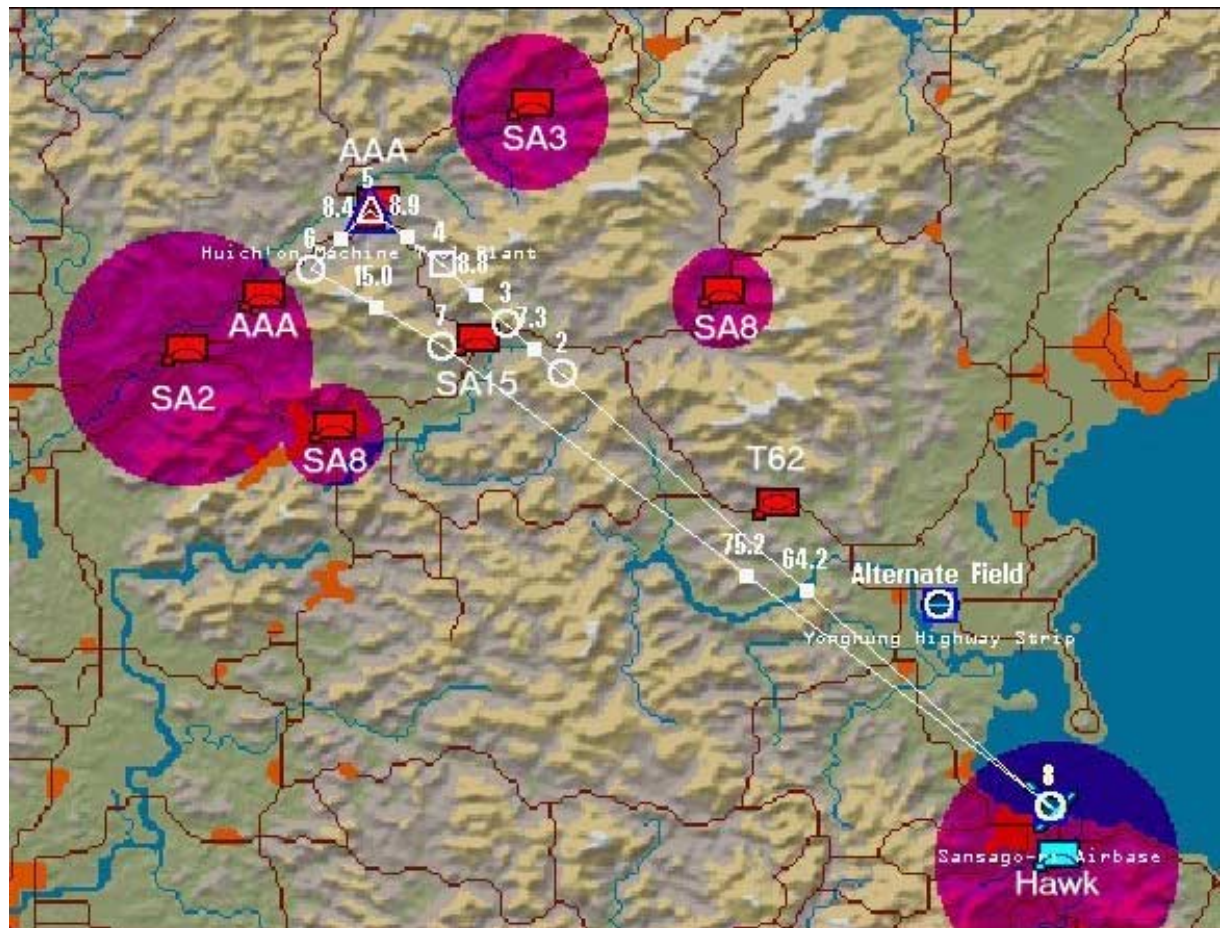

Our pilots will fly in Package 97, consisting of 4 F-16C.
A-A loadouts are fixed, A-G loadouts are free choice.
Steerpoints are also fixed.

The A-A loadout consists of 2 Aim 9M and 4 Aim-120B.
Default A-G loadout is 2 BSU-50.

Intel has produced a threat assessment map with the last known locations for the enemys Sam and AAA battallions in the area. These data are only 2 hrs old so they should be accurate.

Known ground threats are SA 2, SA3, SA8, SA15 and AAA.

Note: There might also be one or two HQ battallions on the move along the road that crosses our flightpath west of the T62 battalion. Intel has no accurate location on them so keep your eyes open.

Known Air Threats are SU-27 and Mig-23, so be aware of the risk for high-speed intercepts!

Good Luck!

Triton
