

## Friendly Flankers

By Triton

As you recall from last weeks mission, enemy SU-27s were based at Cheongju airbase. Our Armoured forces made a lightning assault and siezed that base with the Flankers still on the ground, so we are now putting them to good use! ☺

Available flights are in the package 3690:  
Deep Strike (F-16), SEAD Escort (F-16) and Escort (SU-27).  
The F-4 flights are not for human use.

The Map:

As you see, the target is well defended by ADA. SA-5, SA-6, SA-2 and a HQ battallion. The SEAD has it's work cut out for them on this one!

Intel is not very good, but we are aware of at least 1 squadron of MiG-29 and 1 squadron of SU-27 based in this region.

It may well be more, but we have no indications of that at the moment.

Stay on your toes!

The target recon for Deep Strike:

The target is the big depot shown on the picture.

Steerpoints are fixed, A-A loadouts are fixed, A-G loadouts are free choice.

NOTE: The SU-27 Escort only has 6 a-a missiles on board, despite being able to carry more. Adding more is not allowed.

As a last minute note: Be aware of the F-4 flights, they are tasked with striking the SA-2 battallion so they will be in the vicinity of your flightpath!

Good luck!

Col. Triton
