

# **Hamhung Strike**

By Triton

The mission is to strike the Hamhung Nuclear Plant.

It should be a fairly easy one, ADA threats are low although there are several AAA emplacements at the target.

The enemies Air force has taken a pounding lately and is not at it's peak, but they still have large quantities of fighters to deploy so keep an eye out for them.

It is quite possible that the stretch to the target may be calm, but once we've hit the target they'll know we are there... so they may try to intercept our fighters.

The frag order consists of two flights:

Deep Strike (4x F-16)

DCA (2x F-14)

You may fly any of these flights.

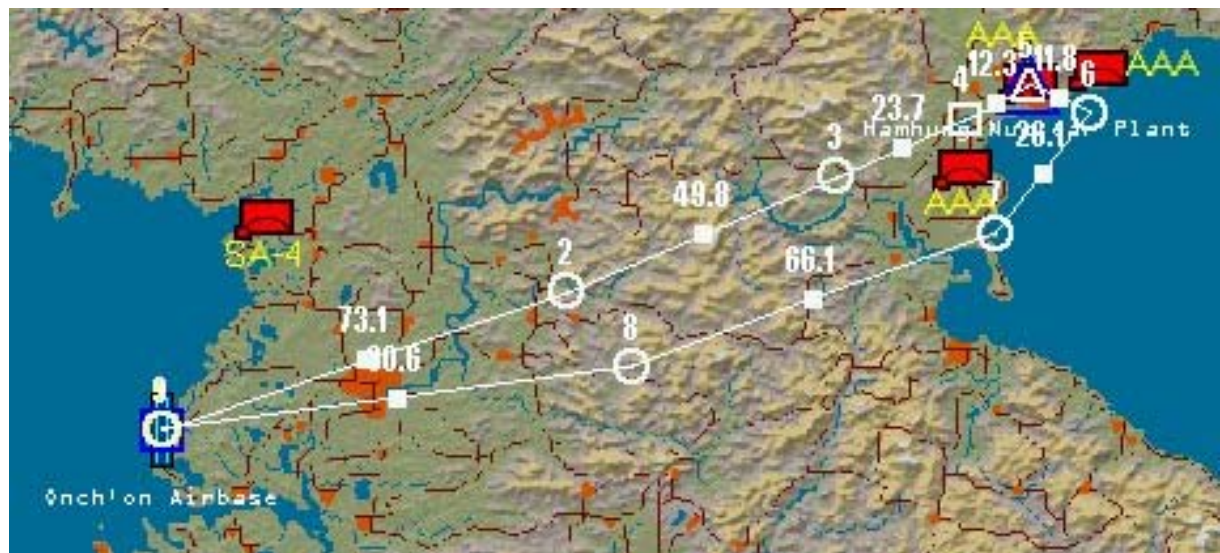

Loadouts are free, steerpoints are fixed.

Recon:

There is a AAA unit right at the target site, so be careful!

The Map:

It's a long flight, so don't get careless... ☺

Good Luck!

Col. Triton
