

Hold The Line **Mission Briefing**

Situation

A major battle has developed with fighting centred around Euseong Bridge. The US 3687th SP Guns Battalion, has retreated across Euseong bridge with orders to hold the line until reinforcements can arrive. A large artillery battle has been in progress for several hours, however the DPRK reinforcements have already arrived and they are beginning to win the battle. Command has decided to destroy the bridge to prevent a breakthrough and to hit the DPRK battalions before they can attack elsewhere in the region.

Intelligence

Intelligence has identified the presence of an SA3 battalion, a SA5 battalion and a AAA battalion in the area. Be sure to take appropriate action to avoid these threats. It is likely that the enemy will have CAP patrols in the area. We also appear to have a

security leak in our HQ. Enemy MIG 29's have successfully intercepted many of our recent missions. Be aware of this threat and maintain high situational awareness at all times.

Good Luck.
