

Last Hurrah

The war has not faired well, we have been driven back to a large pocket on the east coast. The enemys Blitz caught us with our pants down and reinforcements are rushed in but they will not arrive quite yet.

These reinforcements will arrive in two places, one contingent will land on the small strip of coast we still control and the rest will attempt an Amphibious assault on the south coast between Hwa Dong and Pusan.

Our job is to destroy the enemys airstrips in the region in order to help our troops land without being bombed to bits.

We are tasked with striking Hwa Dong Airbase together with some air defence assets in that area.

There are two packages:

Package 97 Deep Strike (2 F-16C):

Target Hwa Dong Airbase, Runway.

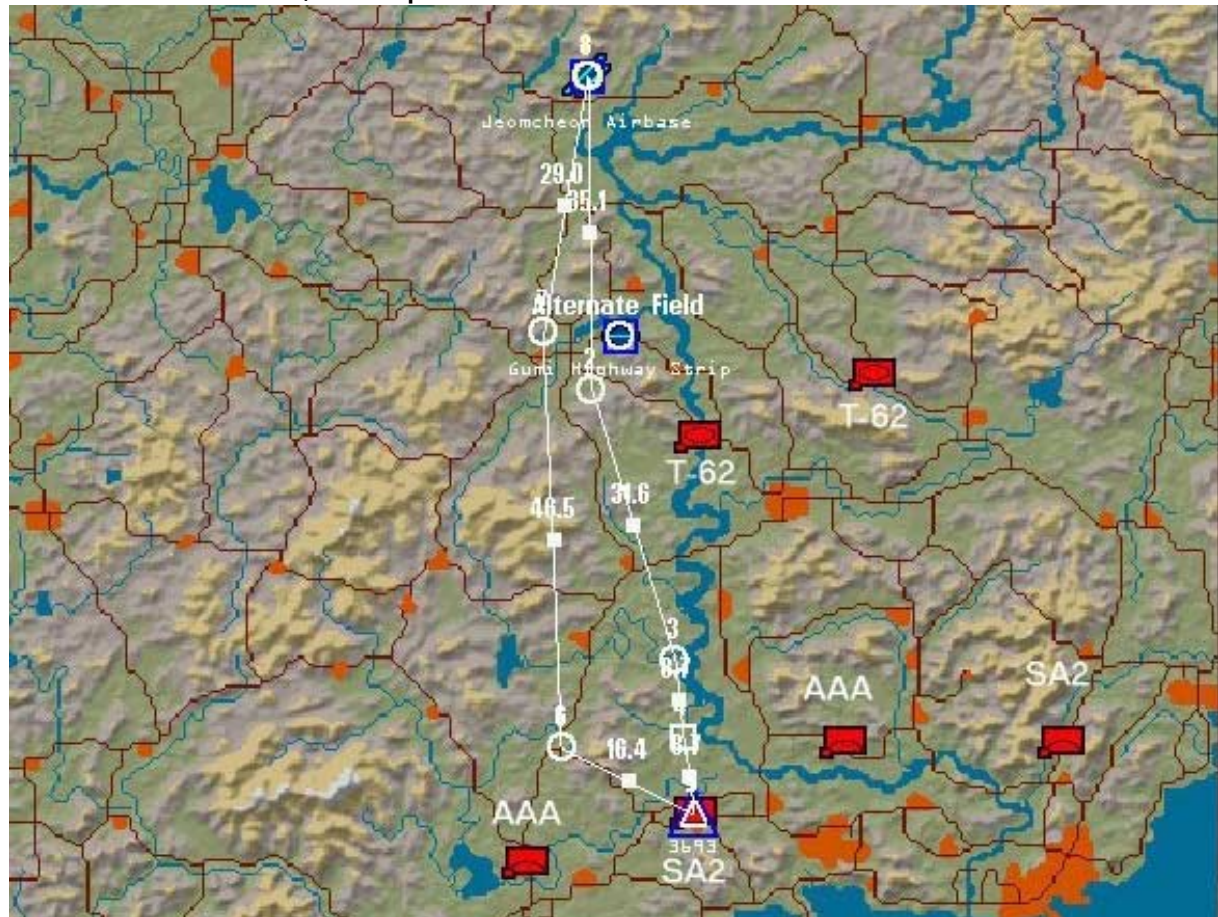

Loadout 2 Aim-9M, 4 Aim-120B, 6 BLU-107.

Loadouts are FIXED.

Steerpoints are FIXED.

Loadouts are FIXED, Steerpoints are FIXED.

Air threats:

A wide range of fighters are deployed within striking distance, the enemy wants to do as much damage as he possibly can before any reinforcements arrive.

Mig-19, Mig-23, Mig-29 and SU-27 Squadrons are based around the salient.

NOTE: The AA-12 Adder is reported to be available for the SU-27s so if you can't avoid confronting them make sure you get the first shot off!!

We've got our backs to the wall gentlemen, so we must perform at our absolute maximum!

Good Luck!

Col. Triton
