

## **Powerstrike**

Today we are to hit a nuclear powerplant.

Intel gathers that air resistance should not be dense, however the ADA is quite capable in the region.

Enemy airpower consists of MiG-21, MiG-23 and MiG-29.

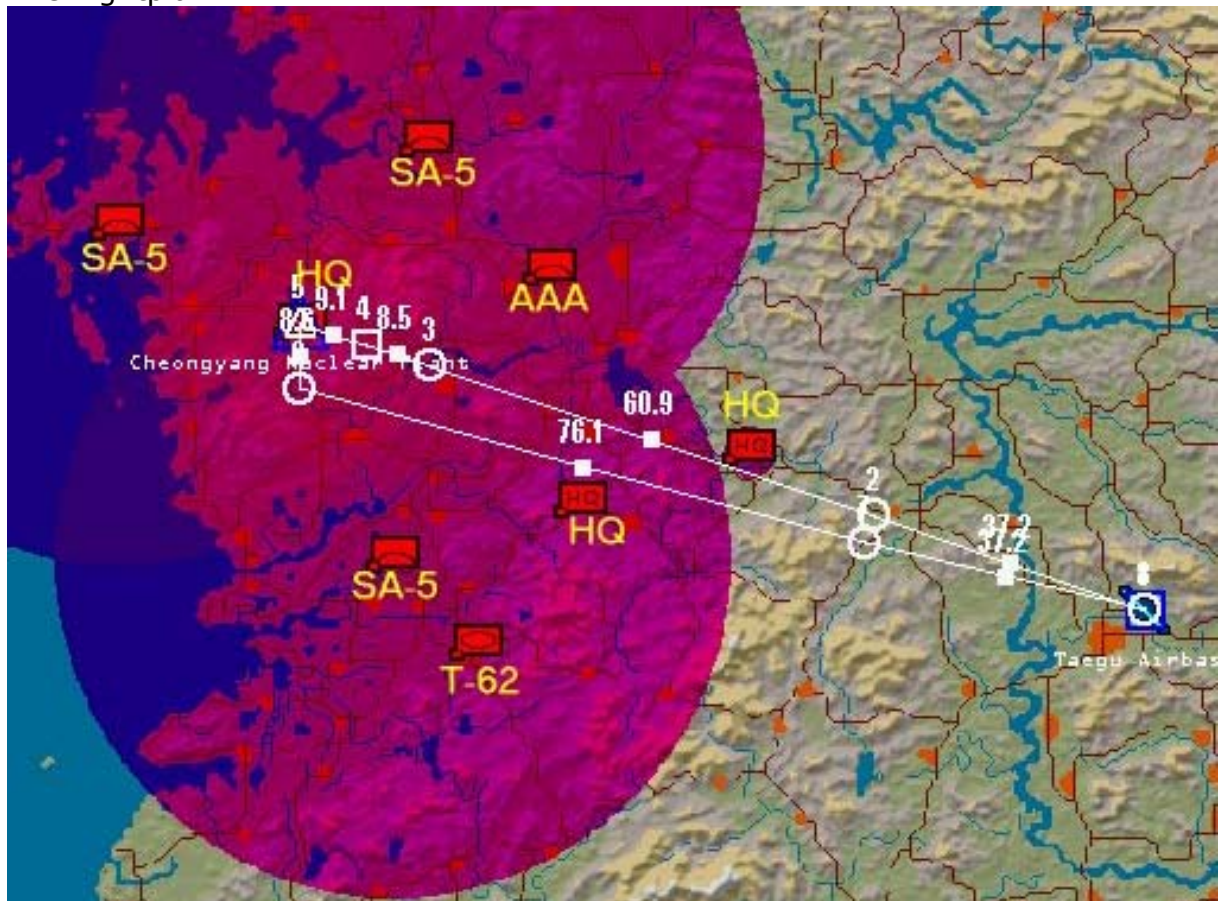

We fly in two 2-ship flights:

2-ship F-16 SEAD Escort and 2-ship F-16 Deep Strike.

These two flights are the only ones allowed for humans.

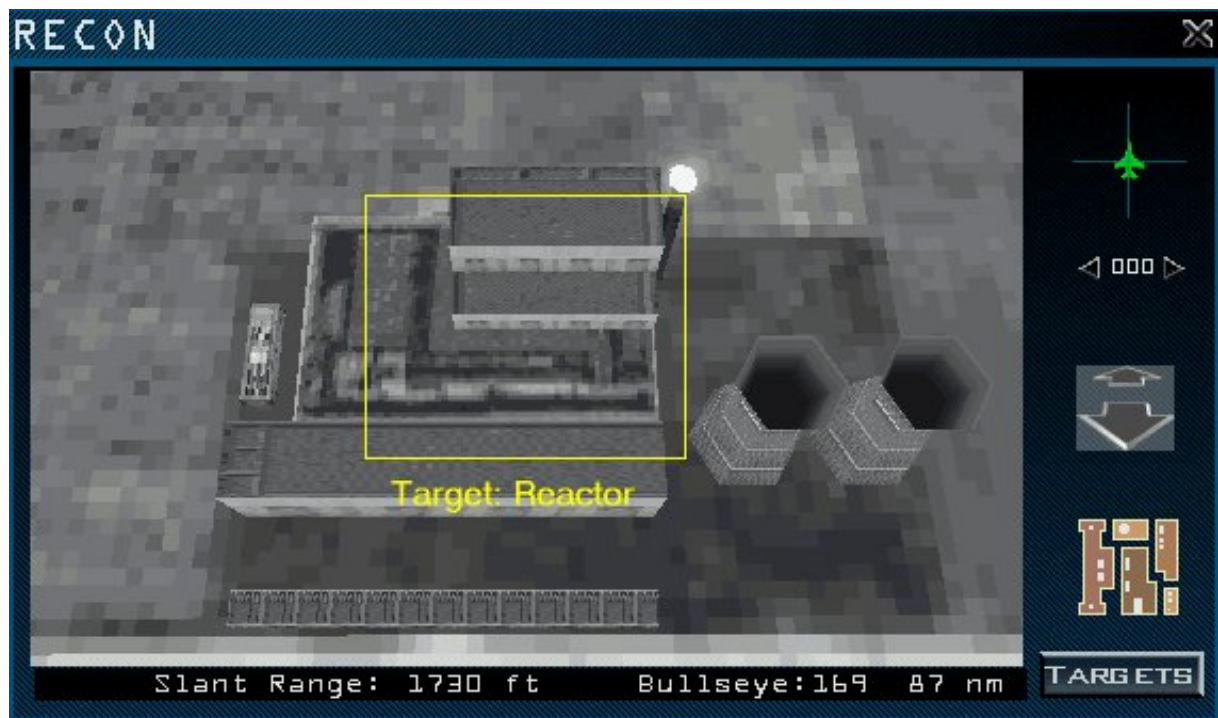

Loadouts and steerpoints are free choice.

The flightplan:

There are plenty of HQ-battallions in this region, so watch out.... Intel warns us that some of them may be moving.

The target:

Good Luck,  
Col. Triton
