

Sub Hunt

By Triton

DPRK submarine forces have been giving our supply transports a hard time lately, so the 185th has been tasked with striking one of their main sub bases.

Loadouts are free, steerpoints are fixed.

Intel:

Enemy ADA are low in the area, only a SA-4 and a HQ battallion are in that region.

Enemy airpower is plentiful but of low quality, only MiG-19, -21 and -23.

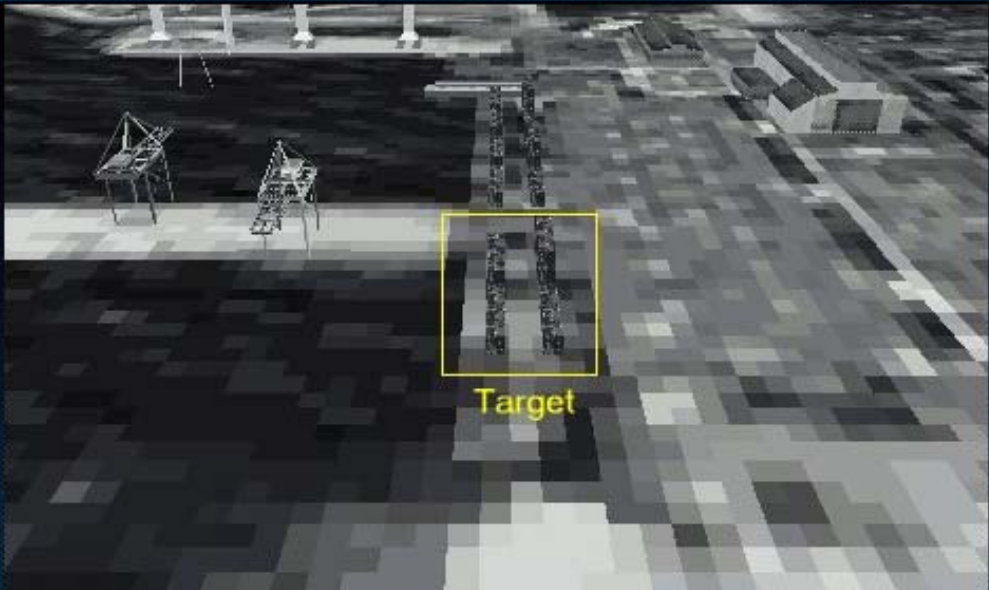

Shouldn't be much of a threat, but don't get over-confident! ☺
