

MISSION BRIEF

To the Mill

Command's priority is hitting war production plant and your target is the Steel Mill at Songnim.

Enemy air activity is expected to be high, with modern fighters in theatre. Don't engage unless you have to.

Your package is No. 1031, comprising of a two-ship F-16 strike flight out of Kimpo International, joining up with a two-ship F-16 SEAD escort flight from Mandumi.

An F-4G flight is already airborne to strike an SA-5 site to the north, with F-15Cs as escort. Neither of these flights are for human use.

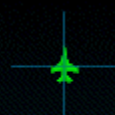

The primary target is the main factory. It's a big factory and at least two hits will be needed to destroy it, even using penetration bombs.

Steerpoints are at flight lead's discretion but be wary of deviating too far and forcing dangerous engagements.

All weapons are also at the flight lead's discretion. Your aircraft will be clean when you join so don't forget to load the weapons.
